PERSONAL INFO

Hello, I am a software developer who thrives in creative and collaborative work environments, equipped with strong project management skills. I possess advanced knowledge in frontend technologies and continuously work on improving my backend expertise. My passion for software development and curiosity for learning keep me open to innovation and focused on achieving goals.

WORK HISTORY

MID LEVEL FRONTEND DEVELOPER

TalentRank.ai - Ankara - Remote

January 2025 - currently

I work as a frontend developer at a company that develops AI-based interview web applications, creating user-focused interfaces and dynamic web components using React and modern frontend technologies.

FRONTEND DEVELOPER

Ünlem Bilişim - Kayseri/Turkey June 2024 - November 2024

I developed user-friendly interfaces, performance optimizations, and reusable components for CRM projects using React, TailwindCSS, ChakraUI, and TypeScript. I managed data flow, testing, and team collaboration processes with Redux, Jest, and Agile methodologies. Additionally, I contributed to the development of a Front-End Engine and a custom UI library.

INTERN FRONTEND DEVELOPER

KCTEK - Kayseri/Turkey

December 2023 - February 2024

I developed modern, user-focused, and accessible websites using HTML, CSS, JavaScript, Bootstrap, and React. While creating responsive designs compatible with all devices using Bootstrap, I crafted dynamic and interactive content with JavaScript. By leveraging React, I built reusable components to enhance application performance.

INTERN FRONTEND DEVELOPER

Moon Workshop - Antalya

July 2023 - August 2023

I developed modern, user-focused, and accessible websites using HTML, CSS, JavaScript, and Bootstrap. While creating responsive designs compatible with all devices using Bootstrap, I designed dynamic and interactive content with JavaScript. By using React, I developed reusable components to improve application performance.
